

Showcase – mid range/general purpose example

Model QBD2* stability and uniformity $\pm 0.1^{\circ}\text{C}$, temperature range: ambient $+5$ to 130°C

A versatile general purpose system with two removable/interchangeable blocks and a comprehensive specification to suit most dry block heating applications in the laboratory.

- **Stability and uniformity:** $\pm 0.1^{\circ}\text{C}$
- **Digital temperature control** for optimum precision
- **Heating range:** ambient $+5^{\circ}\text{C}$ to 130°C , with rapid heat-up time
- **Range of convenient features** including alarms, single and dual point calibration, programmed start/stop, 'offset' for known sample temperature variation and choice of external or internal probes
- **External probe available** for accurate temperature control in a tube

Microplate or microtube blocks for 0.2 ml tubes, strips and 96-well microplates used in molecular biology and biotechnology applications.

Wide range of interchangeable blocks (order blocks separately) – extraction tool supplied as standard for easy and safe removal of blocks.

Custom blocks – for virtually any tube or vessel.

High power heater for fast heat-up – from 25°C to 100°C in only 20 minutes.

Over temperature cut-out protects your samples and your workplace.

Optional safety cover – protects samples from contamination and users from accidental contact with hot blocks.

Convenient timer facility, with audible buzzer, for reaction timing and function timing, e.g. delayed heater switch-on/turn-off.

Simple to use rotary dial plus two keys for fast, accurate set-up.

Compact footprint and sloping fascia optimise benchspace and ensure clear visibility during set-up and in use.

High quality, robust construction in streamlined coolwall aluminium and chemical-resistant plastic – durable in demanding environments.
