Excellence in your hands

MORE THAN JUST A BETTER BOTTLE, IT'S A COMPLETE SYSTEM

DISCOVER THE WAY TO MAKE LABORATORY WORK EASIER,
SAFER, MORE ECONOMICAL AND FUN

Borosilicate 3.3 glass bottles are very widely used in scientific research for activities such as sampling, storage, mixing, media preparation and sterilization of liquids. But often they are not given a second thought. DWKLife Sciences pioneered the screw threaded GL45 DURAN® borosilicate glass laboratory bottle way back in 1972. Prior to that date most laboratory reagent bottles had been sealed by a glass stopper. Since its introduction over four decades ago, the DURAN® GL45 laboratory bottle has become the bottle of choice for laboratories around the world.

However since then, the basic form and design of the DURAN® bottle has remained virtually unchanged. Yet the demands on laboratory efficiency, personnel and equipment grow ever more stringent. In response to these demands, DWKLife Sciences initiated a project to develop a laboratory bottle system that was more suited to today's customer requirements.

After extensive market and customer research, twelve key tasks associated with laboratory bottle usage were identified. Significantly, all the tasks involved the manual handling of the bottles and caps. In addition, for most of the key tasks, the clear and unambiguous identification of the bottle and its contents was essential. Therefore the parameters targeted for improvements were ergonomic handling, ease of use, and the development of a better method of bottle identification.

The result is the DURAN® YOUTILITY® bottle, a new generation of glass laboratory bottles for use in a wide and diverse range of scientific research applications. The innovation does not stop at the improved ergonomic bottle shape, but extends to dedicated accessories that incorporate many new innovative features to improve handling, sample identification, and ease of use. The new YOUTILITY® bottle helps to make laboratory work easier, safer, more economical and fun.

DURAN® YOUTILITY®

WELCOME TO THE 21ST CENTURY OF FUNCTIONALITY

The key components in the **YOUTILITY®** system are the innovative DURAN® **YOUTILITY®** borosilicate 3.3 glass bottles. Each **YOUTILITY®** bottle has many features that significantly improve the handling and utilization of the bottle. The specially shaped gripping zones on both sides of the bottle permit easier and safer handling. With the new glass thread, the opening or closing of the **YOUTILITY®** bottle is significantly faster. Yet the thread remains fully compatible with DINGL45 closures and other accessories.

The slimmer **YOUTILITY®** bottle shape allows a more optimal use of limited space in autoclaves and laboratory refrigerators. The bottles can be conveniently stacked horizontally on their sides. A pre-defined labeling area is compatible with the dedicated self-adhesive **YOUTILITY®** bottle labels. The newly designed ceramic print layout on the bottle clearly indicates the nominal volume as well as showing an easy-to-read graduation scale for the fast determination of the contents. A range of sequentially sized bottles are available in the four popular volumes of 125, 250, 500 and 1000 ml. The glass bottles are molded from the tried and tested DURAN® borosilicate 3.3, a pharmacopoeial Type 1 neutral glass. DURAN® glass offers a very good chemical resistance and high temperature resistance. Bottles are available in both clear and amber colored glass. The amber color meets the requirements of the USP < 660 > and Ph. Eur. for UV light protection. The entire **YOUTILITY®** bottle range has an integrated Retrace Code to allow product traceability via a downloadable certificate of conformance.

SHOW YOUR TRUE COLORS

The colorful GL45 Bottle Tags offer an elegant solution to the marking of laboratory bottles. The Bottle Tags can be easily and securely attached around the neck of the **YOUTILITY®** bottle, even with the screw cap in place. The Bottle Tags feature a graspable tab that makes them easy to remove with bare or gloved hands. The silicone Bottle Tags are chemically robust, heat resistant, fully autoclavable and totally reusable. Their potential uses in the laboratory are endless; in a shared lab, tag all your bottles with your favorite color. Or color tag all the bottles used for a particular application or in a certain experiment. No more mix-ups. The GL45 Bottle Tags are available in eight playful colors; red, orange, yellow, green, blue, purple, black and white. Bring some color into your laboratory by choosing your favorite Bottle Tag.

STEPPING UP TO THE MARK

Determining the nominal volume mark on traditional media bottles can be confusing for some users. On the four **YOUTILITY®** bottles, the total volume is clearly and unambiguously indicated. The volume graduations and a Retrace Code are marked in durable white ceramic for a long service life.

ONE GOOD TURN DESERVES ANOTHER

The DURAN®**YOUTILITY**®screwcap features a secure grip, fast opening, and quick closing. The optimized, ergonomic shape of the cap has comfortable grooves and ridges for a more efficient and easier tightening or removal, especially with smaller sized or gloved hands. The inverted cone form and reduced cap diameter offers significant advantages, making handling easier and safer. The shortened thread inside the cap permits faster opening and closing, but is fully compatible with standard DINGL 45 bottles. The tried and tested cap plug sealing system ensures a liquid tight seal. The **YOUTILITY**®screwcap features an integrated two or three character Retrace Code to provide product traceability via a downloadable certificate. The cap is manufactured from a food grade polypropylene that is fully autoclavable and totally reusable.

GOOD THINGS COME IN SMALL PACKAGES

The smaller **YOUTILITY**®packsizes are ideal for users with a lower usage requirement for bottles. In a response to customer demands all sizes of the **YOUTILITY**®bottles are available in packs of four complete bottles.

EXPRESS YOURSELF!

Printable **YOUTILITY®** labels and label creator web app

The accurate and reliable labeling of scientific samples is an integral part of the success of your laboratory. Labels carry critical information such as the description of the contents, composition, concentrations, pH, make-up date, lot number, expiry date, storage conditions, user information, and without them, your research could be unreliable and possibly invalid. Labels are the foundation of an effective laboratory bottle management process.

There are many ways that bottles can be labeled. Our research indicated that users use a wide range of labeling materials and formats such as tape, pre-printed, blank labels and/ or autoclave tape, for labeling bottles. Many labels used in laboratories can be difficult to remove after use, resulting in scratched bottles and extra time wasted cleaning. The **YOUTILITY®** labels were developed to address the need for a reliable, short term method of sample, bottle tracking and identification. The labels will stay on when you need them to do so, and are easy to remove when no longer required. This allows the bottles to be quickly and easily cleaned, ready for re-use. An easy-to-use label creator web app is available to design, and print your own label designs: www.duranlabels.com

The printable **YOUTILITY®** labels are manufactured from a tear resistant, matt white, polyester material coated with a high performance adhesive.

The print receptive top surface will accept a variety of inks, including copier, printer, ballpoint and technical markers (pre-test specific ink for suitability prior to use). The labels are chemically resistant to typical laboratory chemicals such as disinfectants and many solvents. They have a wide temperature performance range (-40 to +150 °C), making them suitable for use in fridges, freezers, autoclaves, incubators and water baths without the risk of the labels drying out or falling off.

The robust **DURAN® YOUTILITY®** identification labels are suitable for use with the **YOUTILITY®** bottle, plus many other types of laboratory glassware, such as GL45 bottles, beakers and conical flasks.

After use, the **YOUTILITY®** labels may be easily and completely removed by peeling. The labels are supplied in a re-sealable, pack of 100 labels on five A4 sheets.

ALL YOU NEED TO KNOW ABOUT DURAN® YOUTILITY®

Now it's your turn to choose your favorite bottle size, colored tags, and accessories. Any further questions or need more information? Get in touch with us at the DURAN® YOUTILITY® website: www.duran-youtility.com
