

The guarantee of your protection will be only ensured after the erlab® laboratory approval. Please contact your supplier and benefit from the ESP® (Erlab Safety Program) for a validation of the safety parameters (type of column, filter lifetime, saturation detection method and replacement filter procedure...), linked to the use of this cabinet.

Technical specifications

Dimensions (inches)						
Ref.	External dimensions			Internal dimensions - without work surface		
	Width	Depth	Height	Width	Depth	Height
Midcap Sd 321	31 1/2"	28 7/16"	45 2/8" mini	30 2/8"	25 3/16"	35"

Structure	
Metallic parts	Anti-corrosion metallic alloy protected by a thermo-hardened anti-acid polymer coating
Side and front panels	5/16" thick acrylic
Filtration module	Polypropylene

Specifications	
Number of columns	1
Number of fans (IP44)	1
Processed air flow	135 cfm
Air velocity at the openings in working position	79 fpm to 118 fpm
Voltage / Frequency	85-260 V / 50-60 Hz
Total power consumption	45 watts (without lighting)
Amperage absorbed	1,6 amp.
Sound level	52 dbA

Modular filtration column			
Molecular filtration efficiency in compliance with NFX 15-211: 2009 class 2 standard		H14 HEPA Filtration	
Type IC Liquid chemicals handlings		Type IP Powders handlings	
 Molecular filter		 H14 HEPA filter	

Equipments

Standard Equipment		Options	
Air flow meter	Permanent air face velocity monitoring system	Work surface N°1	Metallic spill tray with tempered glass work surface
Energy ports	For the passage of cables	Work surface N°2	In phenolic resin with built-in retention tray
Chemical Listing	List of approved chemicals	External lighting	Pivoting - 11 Watts - 400 Lux - IP 20
		Mobicap	Rolling cart made of anti-corrosion metallic alloy
		Transparent back panel	Acrylic

Types of filters available

GF4 AS	For organic vapours
GF4 BE +	For organic vapours + acid vapours
GF4 F	For formaldehyde vapours
GF4 K	For ammonia vapours
GF4 HP	H14 HEPA Filter for powders

Compliance to standards

- CE Marking
- NF P.92.507 (Acrylic part)
- EN 1822 : 1998 (H14 HEPA filter)

* Total height according to filtration column type (inches)

Type IP	45 $\frac{2}{8}"$	Type IC	45 $\frac{2}{8}"$

Molecular filter H14 HEPA filter

Equipments

Standard Equipment		Options	
Air flow meter	Permanent air face velocity monitoring system	Molecode S*	Automatic alarm to detect filter saturation by solvents according to NF X 15 211 : 2009 standard (*compulsory for class 1 configuration)
Flow monitor	Permanent ventilation control device according to EN 14175-2:2003 standard	Work surface N°1	Metallic spill tray with tempered glass work surface
Sampling port	For filter saturation detection (N/A if Molecode S installed)	Work surface N°2	In phenolic resin with built-in retention tray
Programmable timer	Timer - 60 hours setting by default according to NFX 15 211: 2009 standard	External lighting	Pivoting - 11 Watts - 400 Lux - IP 20
Energy ports	For the passage of cables	Internal lighting	Compact tubular fluorescent lighting - 18 Watts - 500 Lux - IP 68
Chemical Listing	List of approved chemicals	Mobicap	Rolling cart made of anti-corrosion metallic alloy
		Benchcap	Fixed work bench made of anti-corrosion metallic alloy
		Shelf	Adjustable sliding shelf for Mobicap and Benchcap
		Transparent back panel	Acrylic

Types of filters available

GF4 AS	For organic vapours
GF4 BE +	For organic vapours + acid vapours
GF4 F	For formaldehyde vapours
GF4 K	For ammonia vapours
GF4 HP	H14 HEPA Filter for powders

Compliance to standards

- AFNOR NF X 15-211:2009 - France
