

Reference electrode only in combination with the Swansensor TRIDES to measure disinfectants

Swansensor Reference TD

Applicable for swimming pools and potable water.

Maintenance-free reference electrode with membrane diaphragm.

Technical data Swansensor Reference TD:

Operating and measuring range:

- 0 to 1 ppm ozone
 - 0 to 10 ppm free chlorine
 - 0 to 3 ppm ClO₂, Br, J
- together with Swansensor TRIDES

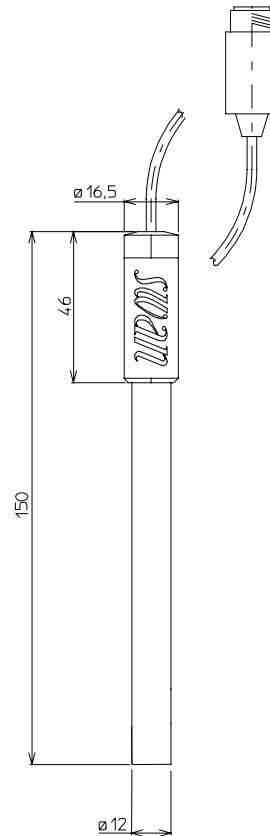

Operating temperature: 0 to 50°C

Pressure: pressure-free

Case material: isotactic polypropylene

Connection: screw plug

Weight: 40 g

Order number	Swansensor Reference TD	A-87.850.100
