# WHY **BODYGUARDS**® **SafeDon**™

ADDED PROTECTION AGAINST INFECTION

Bodyguards SafeDon™ Gloves are dispensed individually from the bottom of the box. This unique dispensing mechanism ensures that the user does not touch the gloves within the box or the box itself whilst donning gloves, this helps to reduce the potential risk of contamination from substances including dirt, dust, paint and grease.

Dispensing any glove type "Cuff 1st" helps to reduce the contamination normally caused by the traditional glove dispensing methods by which the user can touch the glove box with dirty hands or remove gloves from the box by the fingers or palm areas. In addition glove wastage is minimised, as gloves are dispensed individually as and when required

The Bodyguards SafeDon™ glove box is securely contained within a dispensing unit that has an anti-microbial protective additive which helps to prevent the build up and growth of organisms on the glove dispenser.

The Bodyguards SafeDon™ system provides an effective, fast and easy dispensing system which saves time, money and helps to free up space in the workplace.

## What people really think of the new Bodyguards SafeDon dispensing system!

*"Bodyguards Safedon is an excellent dispensing system for disposable gloves. The gloves are a lot easier and quicker to dispense. We always know where to find the gloves and they are kept away from dirty work surfaces as the box is held in a dispenser that is mounted on the wall. The dispensers come in various colours so they look very smart and they are very easy to keep clean."*

Ashley Smith, Owner, Cartridge World, Rotherham

*"This way of dispensing gloves is excellent for us. We don't have to touch the box or other gloves in the box to put gloves on, if our hands are dirty it means that we won't touch other gloves in the box and make them dirty also. We have been using for the first time nitrile gloves from this new Bodyguards Safedon dispensing system and these gloves are excellent, very sensitive but so much stronger than latex and we have cut our glove usage down by about a half, couple this with the way the gloves are dispensed one at a time so we are not wasting gloves, the gloves are kept away from dirty work surfaces and also they are dispensed a lot quicker so we are saving on time and money. An excellent new system"*

Nick Smith, Owner SOS Tyres and Autocare, Nottingham

## KEY BENEFITS

An innovative glove dispensing system featuring many key benefits to the user including:

### EFFICIENCY

This fast, easy dispensing system saves time and can be installed where space is a premium to free up work surfaces.

### COST EFFECTIVE

Minimise glove wastage as gloves are dispensed individually as and when required.

### NEW CUFF 1ST DISPENSING SYSTEM

Efficient system for dispensing and donning gloves. Each glove is dispensed individually and can be donned quickly "Cuff 1st" without touching the fingers and palm areas of the glove, other gloves, or the glove box. This helps to reduce the potential risk of contamination from substances including dirt, dust, paint and grease.

### ERGONOMICALLY DESIGNED DISPENSER

The Bodyguards SafeDon™ acrylic wall mounted dispenser keeps gloves away from surfaces that may be dusty or dirty, this helps save on space. The dispensers can be easily wiped down to maintain hygiene. The acrylic dispenser features an anti-microbial additive and has been designed without joints to avoid harbouring bacteria and trapping moisture.

### FLEXIBLE GLOVE OPTIONS

Each compact cardboard dispensing box contains 100 nitrile, latex or synthetic gloves (X/large glove boxes contain 90 gloves except for Vinyl). When the box of gloves is finished, simply remove the empty box and replace with a new box.

*"A good system for dispensing disposable gloves. The gloves are so much easier to dispense as the gloves come out of the box one at a time and facing the right way so they are much easier and quicker to put on. The box is really neat and compact and being wall mounted means that it releases space from our work surface but it is still easily in reach for us to use."*

Kate Beer, Thou Art Tattoo Studio, Sheffield
